ACADEMIC PROJECT

1.Foodies – Online Food Service Website

Tech Stack: ASP.NET, C#, SQL Server

Developed a web-based food ordering system with menu browsing, order placement, and payment features. Included an admin panel for managing orders, users, and menus, with a secure login and user-friendly UI.

2. Homies - Hotel Management System

Tech Stack: VS code ,PHP (Laravel), MySQL (XAMPP)

Built a hotel management system with features like room booking, payments, reviews, and user queries. Enabled profile management and user interaction. The admin panel handles room and booking management, feedback, and site content. Developed using Laravel MVC and MySQL.
